maitri01.github.io Breslauer Straße 1b, 66121 Saarbruecken, Germany

Research Assistant at CISPA's SprintML Lab and M.Sc. student at Universität des Saarlandes, focusing on trustworthy machine learning, watermarking, data provenance, and machine unlearning.

Skills

Programming
Python, SQL

Machine Learning
PyTorch, Scikit-learn, Pandas, NumPy, TensorFlow

Tools
Git, SLURM, Docker, Linux, Jupyter, SSH, Weights & Biases

Languages
English (C1), German (A2), Gujarati (C2)

Academic Service

Reviewer · ICML MemFM 2026 Workshop Reviewed submissions on model memorisation and machine unlearning.

Honors & Awards

Deutschlandstipendium
10/2025 – 09/2026
Awarded for academic excellence and high potential.

Volunteer Work

ML Mentor · ACM, Mumbai
11/2022 – 07/2023
Mentored 4 students on stock-market prediction.
Guided model development and feature engineering.

Maitri Vignesh Shah
Saarbruecken, 16 October 2026

Professional Experience

Research Assistant **09/2025 – Present**
CISPA Helmholtz Center for Information Security, Germany
- Contributed to watermark radioactivity research and co-authored a paper accepted at **NeurIPS 2026**.
- Designed and implemented **8 CISPA European Hackathon challenges**, selecting datasets, models, and experimental parameters.
- Supported participants at all seven venues with challenge questions, technical troubleshooting, and GPU infrastructure.

Teaching Assistant, Trustworthy ML **04/2026 – 09/2026**
Universität des Saarlandes, Saarbruecken, Germany
- Led trustworthy ML tutorials and co-designed assignments on membership inference and adversarial robustness.

Research Assistant, QuadTransport **05/2023 – 05/2024**
SVKM's NMIMS University, Mumbai, India
- Optimised Wasserstein distance computation using quad-tree methods in Java.

Education

M.Sc. in Data Science & AI **04/2025 – Present**
Universität des Saarlandes, Saarbruecken, Germany

B.Tech. in Artificial Intelligence **08/2020 – 08/2024**
SVKM's NMIMS University, Mumbai, India CGPA: 3.95 / 4.0

Projects

ML in PL 2026 Tutorials **10/2026**
- Created hands-on challenges for privacy and security in machine learning tutorials and supported participants.

Publications

RADIUM: RadioActive Decay of Image-Underlaid Marks
M. Meintz, L. Kerner, **M. V. Shah**, S. Hector, F. Boenisch, A. Dziedzic
NeurIPS 2026, accepted. Paper · Code
Introduces an anytime-valid test for watermark radioactivity, tracing watermarked training images through new generative models. Evaluation across seven watermarks shows how retraining and architecture changes weaken this signal.

Watermark Degradation Across Model Iterations
M. Meintz, **M. V. Shah**, B. Zhao, L. Kerner, F. Boenisch, A. Dziedzic
ACM IH&MMSec 2026, pp. 177–182. DOI
Uses dataset inference to trace watermarks through model generations. Finds one method detectable with just 1% watermarked training data, while others degrade.
